

EuraTex

Authentic textures

Color your world

EURAMAX

Rough skins

Matte beauty

● Pre-coated façade panels

○ Powder coated surfaces in matching colors

It is possible to combine pre-coated aluminum metal cladding panels and match a powder coating that can be used for window frames and other façade details. We work with partners that can develop matching powder coatings to assure aesthetic color equality.

Guidelines

- Install panels in the same direction to avoid reflection differences
- Order projects in one batch to avoid color differences
- Many other colors available on www.euramax.eu

EuraTex is a range of pre-coated finishes that offers more than color alone. Paint surfaces vary from subtle to rough textures. Aesthetically, the finishes are comparable to powder coatings and materials like terra cotta and Glass Reinforced Cement.

All colors in the EuraTex range are based on HDP coatings in matte finishes. However, when observed in exterior conditions under sunlight, finishes can show vivid reflections.

The EuraTex Natural range (0.3-2.0 mm gauge) is inspired by earthy colors and are given matte shades (up to 5 gloss units).

EuraTex Fine
Powder - Signale Grey (≈RAL7004)
E-70-02-F-001324.00

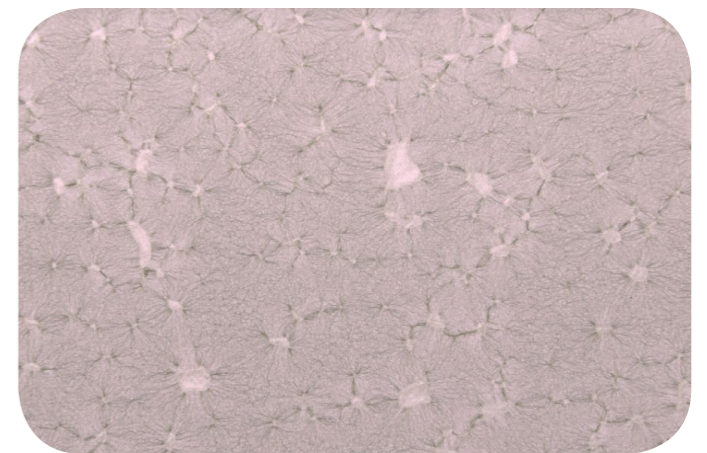

EuraTex Design is a range (0.5-1.0 mm gauge) where textured paints are given an additional manufacturing process step on our state of art screen technology paintline. This leads to truly unique paint finishes. Custom developments are possible, however minimum quantities apply.

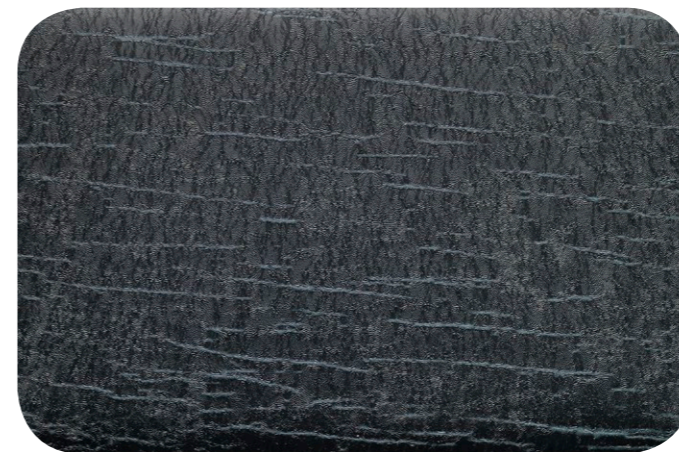

EuraTex - Design

EuraTex Design
Glistening Snow
E-72-03-F-002064.05

EuraTex Design
Paspaley Zincflowers
E-72-04-F-001744.05

EuraTex Design
Zincflowers Gold
E-72-06-F-000671.05

The **EuraTex Powder range** (0.3-2.0 mm gauge) has surfaces comparable to that of powder coatings. Widely used colors have been chosen so they can either be used instead of popular smooth surfaces, or even better, to combine with them.
